

Assignment 2

Objectives

Demonstrate intermediate web development using by applying the following skills:

- HTML,CSS,Responsive Web Design, JavaScript

Task

Create an interactive web application for a main topic and minimum 2 subtopics, using only a one html (index.html), one css (style.css) and one javascript (main.js) file.

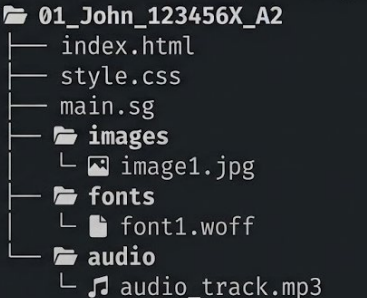

The topic should be educational and very familiar to you.

Your target audience should learn something new after using your app. Possible areas of topics could be Sports, Science, Technology, Biology, etc. topics that are already familiar with you. The topic should NOT be coding related.

Do NOT promote any movie or video games or any topics that is sensitive or offensive or controversial or against the law. It should be education and academic friendly and must be approved by the teachers before you proceed.

Use a page management system to navigate among topics (while remaining on the same HTML page). It should include a Mini-Game to demonstrate the topic. Use only Vanilla Javascript.

Expected Folder Structure

The base folder should be named as LabNo_YourName_AdminNo_A2. All 3 html files should be in the base folder Within there should be a subfolder images, where css and image files. Add appropriate subfolders if you wish to use font files or audio files.	 <pre>01_John_123456X_A2 ├── index.html ├── style.css ├── main.sg ├── images │ └── image1.jpg ├── fonts │ └── font1.woff └── audio └── audio_track.mp3</pre>
--	---

- All media (images, fonts, audio) must be downloaded and save in the images/fonts/audio folder (local folder) renamed to proper naming requirements. Do NOT reference them online. Do NOT include videos.
- Do NOT use third party libraries nor frameworks (e.g. fontawesome, bootstrap, tailwind, jquery, react)

The webapp should be published online using github pages. The URL should be <https://xxyyzz.github.io/webdevA2> (where xxyyzz is your github id).

Guidelines (non-exhaustive)

Description	Category
HTML Validation: https://validator.w3.org/	HTML/CSS
CSS Validation: https://jigsaw.w3.org/css-validator/#validate_by_input	
Proper indentation and line breaks for HTML/CSS	
Useful comments for HTML and CSS	
Apply proper HTML and CSS Techniques	
Apply CSS Animations	
Apply CSS Transitions	
Apply CSS Sprites	
Meaningful and Education Friendly Content	JS
Javascript Validation: https://beautifytools.com/javascript-validator.php	
Use of external JS file (not internal or inline JS)	

Late Submission Policy

A penalty of 50% capped will be applied to the base score for assignments or projects submitted within 5 calendar days after the due date. Work submitted more than 5 calendar days past the due date will receive a score of zero.

Extension will be given for exceptional reasons. Laptop Crash or Data Loss is NOT acceptable (you should have a backup strategy)

Academic Integrity Policy

Assessment Rubrics

	Criteria		Level of Achievement				
	Performance Level		Excellent (A)	Very Good (B)	Good (C)	Satisfactory (D)	Unsatisfactory (F)
	Score Range		Pass: 80 and above	Pass: 70 -79	Pass: 60 - 69	Pass: 50-59	Fail: Below 50
1	HTML/CSS	20	Most requirements for HTML/CSS were completed with quality, and additional efforts to demonstrate mastery in HTML/CSS	Many requirements for HTML/CSS were attempted and most were completed with quality	Some requirements for HTML/CSS were attempted and all were completed with quality	Few requirements for HTML/CSS were attempted and some were completed with quality	Very few or no requirements for HTML/CSS were completed
2	JavaScript	30	Most requirements for Javascript were completed with quality, and additional efforts to demonstrate mastery in Javascript	Many requirements for JavaScript were attempted and most were completed with quality	Some requirements for JavaScript were attempted and all were completed with quality	Few requirements for JavaScript were attempted and some were completed with quality	Very few or no requirements for JavaScript were completed
3	Responsive Web Design (RWD)	10	Most requirements for RWD were attempted and completed with quality, and additional effort to demonstrate mastery in RWD	Many requirements for RWD were attempted and most were completed with quality	Some requirements for RWD were attempted and all were completed with quality	Few requirements for RWD were attempted and some were completed with quality	Very few or no requirements for RWD were completd
4	Online Deployment	10	Most requirements of Online Deployment are followed accurately	Many requirements of Online Deployment are properly followed	Some requirements of Online Deployment are properly followed	Few requirements of Online Deployment are properly followed	Very few or no requirements of Online Deployment are followed
5	Organisation	10	Most requirements of organization are followed accurately	Many requirements of organization are properly followed	Some requirements of organization are properly followed	Few requirements of organization are properly followed	Very few or no requirements of organization are followed
6	Play Test	10	Playtest results are submitted with clear indication of strengths and recommendation of improvements	Playtest results are submitted with identified strengths and areas needing work, though recommendations improve lack specific, actionable steps.	Playtest results are submitted but rely heavily on raw data or vague observations without clearly separating strengths from weaknesses.	Playtest results are incomplete, disorganized, or purely emotional; the feedback highlights bugs or complaints but offers no structural insight into what worked or what didn't.	Playtest results are missing entirely, or the submission lacks any usable data, feedback, or analysis
